

**REMARKS**

This Amendment, filed in reply to the Office Action dated June 28, 2006, is believed to be fully responsive to each point of rejection raised therein. Accordingly, favorable reconsideration on the merits is respectfully requested.

Claims 2-6, 8-16 and 18-34 are all the claims pending in the application.

Claims 2-6, 8-16 and 18-34 remain pending and stand rejected under 35 U.S.C. § 112, first paragraph, as purportedly containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention.

Applicant submits that the claims are supported by Fig. 7 which shows the gate of a ferroelectric gate transistor (DR) is directly connected to a data line  $Vg(n)$ . Applicant amends the specification at page 16 to conform the claims, drawings and disclosure. No new matter is added by this amendment as the subject matter was illustrated in the originally-filed Fig. 7. Similarly, Fig. 19 includes a description of direct data line connections to the gates of first and second ferroelectric gate transistors. Pages 26-27 are also amended to conform the claims, drawings and disclosure. It is noted that the direct connection of the data lines are for purposes of row selection.

None of the cited art teach this feature, and any new rejection over prior art references must be made on a non-final basis.

Applicant adds claims 42 and 43 to describe the nature of the data line connection to the gates more particularly.
